**Subject: Letter of Recommendation – XP Sea**

I, the undersigned, Loïc Bruneau, Head of the Civil Naval Activity at EKIUM, hereby certify that I have regularly engaged XP Sea within our activity since 2021 as part of various projects.

During this period, XP Sea was involved in assignments including project management, technical coordination and interface management on several engineering projects (vessel conversion for fiber-optic cable laying, conversion of an LNG carrier into an FSRU, conversion of a tanker into a FPSO), playing a key role in the successful execution of the activities entrusted to him. He demonstrated strong technical expertise in naval engineering, as well as an excellent understanding of the organizational and contractual challenges specific to complex projects.

Beyond his technical skills, XP Sea stands out for his coordination abilities, rigor, and capacity to facilitate communication between the various stakeholders and to contribute effectively to decision-making.

I also particularly appreciated his managerial and interpersonal qualities: attentiveness, reliability, a strong sense of reporting, and a constructive approach.

For all these reasons, I am convinced that XP Sea will be a major asset to any organization that places its trust in him.

I remain, of course, available for any further information.
